*All of the growth and income included for each month was earned, but not necessarily paid, in that month. All capital appreciation is being shown in the month that the maturity or early liquidation occurred, and does not reflect daily price fluctuations. Yearly returns are time weighted and are calculated with the following formula. Sum of (1+a month's Return as a %) times (1+the following month's Return as a percent. This is done for every month of the year, minus 1 at the conclusion of the year. Total Return is calculated similarly, but for each month over the life of the investment and not limited by individual years. The figures shown in the income portion are exclusive of fees earned by Ancorato, as fees are taken from the income portion of the investment. The monthly total return value is calculated by adding month's income and capital appreciation.

10 Example Fixed-Income Notes in Portfolio* (list is not all inclusive)									
Underliers	Rate	Duration (Months)	Date Purchased	Principal Protection	Coupon Protection	Issuing Bank
